## Remote Vision System

Jet Stream Remote Vision System (RVSA) is everything you need for a quick compact tactical camera deployment. It's easy to set up and easy to use. This is truly a mobile and portable system that puts a telescoping tripod mast, camera, power source and broadcast communication capability into a waterproof hard case. RVS is completely cloud enabled to allow for seamless remote viewing of on-the-ground operations. You get live real-time and recorded high definition video. You can view it remotely, via a computer or laptop, or even view it on your smartphone or tablet.

### Features:

- Quickly deploy in under 5 minutes
- First responders communications Band 14/71
- Rugged 1080p PTZ IP camera
- integrates - Valuable addition to existing system

### Complete Cloud Management by AXIOM

- Instant access to all cameras
- Object detection (Person, Car, Facial)
- Embed live cameras into a webpage
- Extend Axiom to work the other Video Software

## Next Step

Leverage your Axiom platform to enable full situational awareness from all of your cameras, including Quick Deploy Kits, Drones, Tactical Vehicles and City Surveillance. One dashboard for all of your cameras, anywhere in the world.
